## PREFACE

This guide had been developed over the years to answer most general questions that arise regarding the process of obtaining building or plumbing permits. If this guide does not fully answer your questions or if you have more specific questions, please feel free to call the Division of Building Code Enforcement at (502) 573-0373 or Division of Plumbing at (502) 573-0397.

**FIRST STEP:** When planning a new construction project for Kentucky please contact the local planning/zoning authority to ensure the proposed construction site is properly zoned. In many cases, substantial delays can be experienced if rezoning or zoning appeals are necessary. The Department of Housing, Buildings & Construction (DHBC) has no authority over local planning/zoning commissions. Call the city or county government to determine if there are local zoning requirements.

**SECOND STEP:** Determine if the state or local Building Department has building code enforcement responsibility. Kentucky is unique in that code enforcement responsibilities are divided between state and local jurisdictions with virtually no duplication of code enforcement activities.

Basically, local building code programs review the smaller construction projects and the state reviews the larger ones. Section 104.0 of the 2007 KBC identifies building code enforcement responsibilities. Please refer to Page 18 of this "Guide" to determine who will review your project. Local jurisdictions may petition the DHBC for additional responsibilities beyond the minimum assigned by law. A listing of those local jurisdictions currently having additional responsibilities can be found on our web-site, [www.dhbc.ky.gov](http://www.dhbc.ky.gov) or obtained by phoning our office at 502-573-0373.

There are still several city and county governments that do not have Building Code Enforcement programs. In these areas, the Department is responsible for all buildings other than single family dwellings. Page 17 of this Guide describes the types of projects to be reviewed locally or by this Office. If you are unaware of a local code enforcement program, call this office to confirm.

After determining whether the Department or the local code official has jurisdiction, the **Third/Final step** is to make initial contact with the appropriate code enforcement agency to determine the process for obtaining a building construction permit. Each local agency determines its own permit process and they may vary across the state. The Department has developed this detailed Plan Submission Application Guide to answer most general questions regarding who, what, when, where and how of obtaining a building construction permit for those project under the jurisdiction of the Department. More specific questions can be directed to one of several plan review technicians located in the Division of Plumbing or Division of Building Code Enforcement.
